Skills

React, TypeScript, JavaScript, HTML, CSS, Tailwind, Next.js, Node.js, SSR (Server Side Rendering), Python, FastAPI, PostgreSQL, Kubernetes, AWS, Git, GitHub, Cursor

Work Experience

Honor - Senior Full Stack Software Engineer

May 2024 - Aug 2026

- Architected and engineered a page builder in Next.js, React, and TypeScript to generate SEO optimized HTML and CSS, compressing landing page delivery from 2 weeks to under 30 minutes.
- Led the development end-to-end of a lead-generation chatbot with a Python FastAPI backend and Server Side Rendered React frontend generating \$1.3 million in annualized ARR.
- Accelerated CI/CD workflows by 4x through Node.js profiling, test sharding, parallelized build runners, and Bun caching, enabling expanded automated test suites.
- Designed and developed an email API on AWS with FastAPI using SNS to send internal email notifications to thousands of Franchise operators.
- Mentored three mid-level engineers on TypeScript, React, and Next.js best practices providing daily code reviews in GitHub, and setting team standards for agentic development in Cursor.
- Established company-wide LLM observability and evals in Langfuse, a service I maintained in Kubernetes, automating benchmarks for response correctness in a HIPAA environment.
- Engineered a proxy on Cloudflare CDN, Workers, and Workers KV, enabling zero-downtime platform migration and low-latency A/B testing.

Independent Contractor

May 2022 - May 2024

Vetted - Full Stack Software Engineer [Contract]

- Led the development of a Machine Learning based candidate grading system for a healthcare recruiting platform.
- Engineered high-converting Next.js features and React UI components, optimizing user funnels to drive growth in candidate lead generation.
- Mentored a junior developer in writing TypeScript, and SQL queries, performed daily GitHub code reviews, and established Full Stack testing with Jest and Playwright.

RouteFusion - Full Stack Software Engineer [Contract]

- Designed and deployed dashboards in React and TypeScript with a PostgreSQL backend.
- Introduced React and laid the foundation for robust testing in Jest.

Capital One - Full Stack Software Engineer

Feb 2021 - May 2022

- Built lead forms and UI components for the capitalone.com/cars platform using React, TypeScript, and Tailwind CSS, serving millions of auto-loan customers.
- Engineered high-throughput Java backend services, integrating real-time data pipelines into the core recommendation engine to power customer vehicle matching.

Handsome Inc. - Software Engineer

Aug 2019 - May 2020

- Developed and maintained responsive user interfaces using React, JavaScript, and CSS.

Education

Southwestern University - B.S. in Computer Science, Dean's List

Graduated Dec 2020

Languages

English (Native), Spanish (Fluent)
